Motivation

Objective:

- what were the aims of your project, and what is the context – in terms of subject matter questions, and in terms of applicable statistical and computational tools.
- To study

What has been done so far...

- state clearly what you were able to accomplish during the course, illustrate methods used and results.
-
-

Future works

elaborate on future plans; can what you did during the course be the basis for a continuing project/collaboration?

The end
